SUMMARY

Principal Flutter Engineer with 7 years of experience building and shipping production mobile apps for iOS and Android. Delivered 30+ apps across fintech, ERP/SaaS, government services, real estate, e-commerce and delivery, mainly for the Saudi market. Leads mobile engineering for the Rassd Cloud product line and the Madark fintech app, owning architecture, engineering standards and the release pipeline. Specializes in Clean Architecture, offline-first data, secure payments, bilingual Arabic/English (RTL) interfaces, automated testing and CI/CD. Publishes open-source Dart packages on pub.dev.

EXPERIENCE

Lead Flutter Engineer, Madark Digital Solutions

Dec 2025 – Present

Contract | Saudi Arabia (Remote)

Madark is a fintech app for education financing. Parents apply for tuition financing, choose an installment plan and repay it in the app. [App Store](#) | [Google Play](#)

- Lead development of the Flutter user app, which has 20+ feature modules (onboarding, KYC, finance requests, payments, withdrawals, complaints). The app follows Clean Architecture with GetX state management and GetIt dependency injection.
- Integrated Apple Pay and card payments through a payment gateway SDK. Built discounted tuition payments and PDF receipts that users can view, print and share.
- Implemented Nafath national identity verification with real-time status updates over SignalR. Added biometric login and SMS OTP autofill.
- Secured the app to fintech standards with encrypted API requests, SSL pinning, secure storage, and runtime protection against rooted, jailbroken or tampered devices.
- Led a full UI/UX redesign, adding a new design system, dark mode and bilingual Arabic/English RTL screens.
- Set up four build environments (Dev, QA, Pre-Prod, Prod), plus Firebase Crashlytics with PII scrubbing, Remote Config, push notifications and force-update/maintenance flows. Manage App Store and Google Play releases.

Principal Flutter Engineer and Team Lead, World of System and Software

2022 – Present

Full-time | Saudi Arabia (Remote) | worldofss.com

- Lead mobile engineering for the Rassd Cloud ERP/SaaS product line. Own the architecture, coding standards, code reviews and release pipeline, and lead the mobile team.
- Built Rassd Billing, a cloud invoicing app that issues ZATCA-compliant tax invoices and takes card payments directly. [App Store](#) | [Google Play](#)
- Built Rassd Attendance, an app for tracking and reporting employee attendance. [App Store](#) | [Google Play](#)
- Delivered government apps for Saudi chambers of commerce across most of the country's governorates.

Senior Flutter Developer, Sah-App

2023 – 2025

Part-time | Saudi Arabia (Remote) | sahapp.sa

- Developed new features and improved stability for Sah, a real estate platform for searching and listing properties. [App Store](#) | [Google Play](#)

Senior Flutter Developer, Rowad Tqnee

2019 – 2022

Full-time | Saudi Arabia (Remote)

- Built and shipped 20+ apps covering classified ads, social networking, real-time chat, delivery and restaurant ordering.
- Developed Workers and Shops, a platform listing job ads and stores across Saudi Arabia. [App Store](#) | [Google Play](#)

Flutter Developer, Smart Camel Market

2019 – 2022

Freelance | Saudi Arabia (Remote)

- Built Senam, a marketplace for trading camels and accessories, from scratch. Continue to provide its maintenance and feature development. [Google Play](#)

Flutter Developer, Freelance

2019 – 2022

Remote | Clients in Saudi Arabia, Egypt, Morocco and Sudan

- Delivered mobile apps for companies and student graduation projects, and mentored beginners learning Flutter.

PROJECTS AND OPEN SOURCE

Fintech Wallet | github.com/mokinan/flutter-fintech-wallet

- Offline-first, multi-currency wallet. Stores money as integer minor units, uses a transactional outbox with idempotency keys to prevent duplicate payments, and refreshes tokens with a single in-flight request. Includes a PIN/biometric app lock.
- 82 unit, widget and E2E tests and 5 architecture decision records (ADRs). Bloc, Drift, Dio, GitHub Actions

Classifieds Marketplace | github.com/mokinan/flutter-classifieds-marketplace

- Modular monorepo marketplace running against a live REST API. Features cancelable search, stale-while-revalidate offline caching, optimistic UI with rollback, and photo uploads that retry when they fail.
- 48 unit, widget and E2E tests and 3 ADRs. Riverpod 3, go_router, Dio, pub workspaces, GitHub Actions

gcc_validators (Dart package) | pub.dev/packages/gcc_validators

- Validates and normalizes GCC IBANs, Saudi national IDs and Iqamas, Emirates IDs, and mobile and VAT numbers. Supports Arabic digits and returns typed errors.

durable_sync_queue (Dart package) | pub.dev/packages/durable_sync_queue

- Persistent, ordered operation queue for offline-first apps, with retries, idempotency keys, per-group ordering, exponential backoff with jitter and a dead-letter queue.

SKILLS

Languages and Frameworks	Dart, Flutter, Material 3, iOS and Android
State Management	Bloc/Cubit, Riverpod, GetX, Provider
Architecture	Clean Architecture, feature-first modules, SOLID, dependency injection (GetIt), ADRs
Networking and Data	REST APIs, GraphQL, Dio, WebSockets, SignalR, Firebase, Drift (SQLite), Hive, offline sync
Payments and Security	Apple Pay, payment gateway integration, encryption, SSL pinning, biometric authentication
Testing and Quality	unit, widget and integration testing, static analysis, code review
CI/CD and Tools	Git, GitHub Actions, build flavors, Firebase Crashlytics, App Store and Google Play publishing
Other	localization and RTL, push notifications, maps, real-time chat, PDF generation and printing
Leadership	team leadership, mentoring, Agile/Scrum

EDUCATION

B.Sc. in Computer Science, Mansoura University, Egypt	2015 – 2019
GPA 3.28/5.0, Very Good with Honors, ranked 5th in class.	

LANGUAGES

Arabic (native), English (professional working proficiency)
